

Maximillion is committed to reducing the environmental impact of its operations while running the business from its offices or delivering events for our customers

We have adopted best practices and encourage and support our customers to do similarly on their events.

As a responsible client, we would ask you please consider the following ways you can help to reduce your impact on the environment.

- **Conserve energy** – only use the energy that you need for your event and no more. Switch lights off, turn the heating down and resist using air con.
- **Conserve water** – when using toilet facilities, please use water wisely and remember not to leave taps running. Drink tap water!
- **Ditch the car** – choose a location and a venue that minimizes your transport requirements and allows your guests to use public transport.
- **Reduce, reuse, recycle** – when buying goods, try to avoid overly packaged items and decline a carrier bag if you don't need it. Recycle any waste you have at the designated recycling points across the campus.
- **Respect nature** – help us to look after our landscape and wildlife by not littering. Instead, deposit all waste in bins, or at the recycling points provided.
- **Support green businesses** – The Green Tourism Business Scheme recognises businesses that are working to reduce their environmental impact. Businesses are awarded a Bronze, Silver or Gold rating. Maximillion achieved a GTBS Gold rating in 2009 and has maintained this standard since.

For more detailed information, please request our GEM or Greener Event Management hand book.
